What are your top 10 American movies of all time??

The new poll is online now.

In 1998 the American Film Institute (AFI) made a list of the top 100 American films made in the first 100 years of American cinema (1896-1996). Movies produced after 1996 were not included. The top ten movies (according to the AFI) are listed in random order, but with AFI rank following. I immediately knew something was wrong when I noticed there were *no zombie movies.* Also, no movies starring *Mel Gibson*, and no movies featuring the top grossing actor of all time, *Samuel L. Jackson.* Obviously, the AFA omitted a few good movies, and there have been some good films released 1996. I've added some additional movies to the list, which were either great movies and/or made a lot of money (marked with a "*"). Vote for the movies which you think belong on the top ten list. Select up to 10 movies from this list.
