Florida Senate President Mike Haridopolos is PRO LIFE Candidate for US Senate

Senator Mike Haridopolos

Recently I attended a community forum at which Florida Senate President Mike Haridopolos was the featured speaker. He spoke about his goals as the leader of the Florida Senate to get Florida back to work. He also addressed his plans to run against US Senator Bill Nelson. I asked Senator Haridopolos where he stood on the right to life. Senator Haridopolos responded with a pretty forceful explanation as to his strong PRO LIFE position. By comparison, Senator Bill Nelson, is firmly in the PRO ABORTION camp, having "earned" a 100% rating from the radical pro abortion group, NARAL Pro-Choice America. [1. Source: On The Issues web site; NARAL designation is as of 2003]

Here is my advice to everyone in the PRO LIFE movement: Always ask your elected officials where they stand on the RIGHT TO LIFE, every chance you get. This serves several purposes:

1. If the person is PRO ABORTION, their response helps you

determine who to NOT VOTE for;
2. If the person is PRO LIFE, your question confirms to him/her that PRO LIFE VOTERS are active and concerned;
3. If the person avoids taking a position, you can safely assume they will not take a position when it counts—that is, when it is time to stand up for life!
