No coincidences???

Piece of Cake -- or is it the Map? -- hard to tell from this angle!

I know there are many people who **swear there are no coincidences in this world.**[1. For example, my friend, Mike H.] I tend to agree. Yet how do you explain this piece of cake which was seemingly randomly cut and served on the occasion of my daughter's birthday.

Map of Minnesota

Please note the *eerie resemblance* to the map of the state of Minnesota. The *color* of the icing is even the same as that of the map! **Coincidence???**
